Subject Index

Absorption
photochemistry of 3,4,9,10-perylenetetracarboxylic dianhydride dyes: visible absorption and fluorescence of the di(glycyl)imide derivative monomer and dimer in basic aqueous solutions, 189
Acetone
sensitive chemical actinometry with acetone–hydrogen chloride mixtures, 241
Actinometry
sensitive chemical actinometry with acetone–hydrogen chloride mixtures, 241
Amines
radical mechanism in the photoreaction of organic *N*-oxides: oxygen transfer from photoexcited paradiazine di-*N*-oxides to amines, 363
Amines
photoreduction of anthracene by diethylhydroxylamine, 205
Anhydrides
photochemistry of 3,4,9,10-perylenetetracarboxylic dianhydride dyes: visible absorption and fluorescence of the di(glycyl)imide derivative monomer and dimer in basic aqueous solutions, 189
Anthracenes
photochemistry of ketones in solution LXXVIII: kinetics of fluorescence quenching of 9,10-dicyanoanthracene and 9,10-dimethoxyanthracene by acyclic and cyclic unsaturated ketones and the behaviour of the resulting radical ion pairs, 323
photoreduction of anthracene by diethylhydroxylamine, 205
Anthranyl compounds
thermochromism and photochromism of aryl-substituted acyclic azines X: relationship between molecular geometry and fluorescence of anthranyl-substituted compounds, 117
Arenes
selectivities in photocycloadditions of arenes to olefins, 167
Aryl compounds
thermochromism and photochromism of aryl-substituted acyclic azines X: relationship between molecular geometry and fluorescence of anthranyl-substituted compounds, 117
Azines
thermochromism and photochromism of aryl-substituted acyclic azines X: relationship between molecular geometry and fluorescence of anthranyl-substituted compounds, 117
Azobenzene
the cis → trans photoisomerization of azobenzene: an experimental re-examination, 185

Basicity
fluorescence, phosphorescence and basicity in the first excited triplet of 2-methylharmine and harmaline, 109
Borane
UV laser photochemistry of pentaborane(9) at 193 nm: quantum yield for BH_3 formation and its subsequent chemistry, 233

Carvone
the intramolecular photocycloaddition carvone → carvonecamphor, 159
Charge transfer
photoluminescence of ruthenium complexes with molecules exhibiting twisted internal charge transfer states, 69
selectivity and charge transfer in photoreactions of donor–acceptor systems XI: stereoselectivities in meta photocycloadditions of phenol ethers to olefins, 335
Chemiluminescence
molecular emission spectra in the visible and near IR produced in the chemiluminescent reactions of molecular fluorine with organosulfur compounds, 217

© Elsevier Sequoia/Printed in The Netherlands

Coumarins
energy transfer rates in a 7-diethylamino-4-methylcoumarin–rhodamine 6G binary dye mixture laser, 41
photophysical properties of some coumarin derivatives: 5,7-dimethoxycoumarin, 4′,5′-dihydropsoralen, 8-methoxycoumarin (8-MOP) and 8-MOP($^{4',5}_{5',6}$)THD C_4-cyclomonoadduct (THD ≡ thymidine), 125
Cross-sections
UV absorption cross-sections of the monomer and dimer of formic acid, 209
Crystal violet lactone
photochemical fading and photostabilization of the crystal violet lactone colour former system, 379

Detectors
the characterization of germanium p–n junction detectors for use in nanosecond time-resolved near-IR spectroscopic studies: the photosensitized formation of singlet molecular oxygen ($^1\Delta_g$) in solution, 19
Diazines
radical mechanism in the phororeaction of organic *N*-oxides: oxygen transfer from photoexcited paradiazine di-*N*-oxides to amines, 363
Diazirines
direct photochemical population of triplet diazirines: comparison of triplet energies by direct excitation and by energy transfer, 81
Dimers
UV absorption cross-sections of the monomer and dimer of formic acid, 209
Dissociation
IR fluorescence studies of the IR multiple-photon dissociation of the system CDF_3–CHF_3, 1
Donor–acceptor systems
selectivity and charge transfer in photoreactions of donor–acceptor systems XI: stereoselectivities in meta photocycloadditions of phenol ethers to olefins, 335
Dyes
a technique for reducing the rate of concentration quenching in a dye-sensitized photoelectrode, 257
photochemistry of 3,4,9,10-perylenetetracarboxylic dianhydride dyes: visible absorption and fluorescence of the di(glycyl)imide derivative monomer and dimer in basic aqueous solutions, 189

Energy transfer
direct photochemical population of triplet diazirines: comparison of triplet energies by direct excitation and by energy transfer, 81
energy transfer rates in a 7-diethylamino-4-methylcoumarin–rhodamine 6G binary dye mixture laser, 41
Ethers
selectivity and charge transfer in photoreactions of donor–acceptor systems XI: stereoselectivities in meta photocycloadditions of phenol ethers to olefins, 335

Fading
photochemical fading and photostabilization of the crystal violet lactone colour former system, 379
Flash photolysis
a laser flash photolysis study of the triplet state of *trans*-azastilbenes, 87
flash photolysis study of triphenylimidazole, 347
laser flash photolysis study of (*E*)-1-(2′-arylidene-1′-phenylhydrazinyl)-1,2-dibenzoylalkenes: mechanistic aspects of photochemical ring closure, 147
nanosecond laser flash photolysis of 5-hydroxy-1,4-naphthoquinone (juglone), 95
Fluorescence
fluorescence, phosphorescence and basicity in the first excited triplet of 2-methylharmine and harmaline, 109
IR fluorescence studies of the IR multiple-photon dissociation of the system CDF_3–CHF_3, 1
photochemistry of 3,4,9,10-perylenetetracarboxylic dianhydride dyes: visible absorption and fluorescence of the di(glycyl)imide derivative monomer and dimer in basic aqueous solutions, 189

thermochromism and photochromism of aryl-substituted acyclic azines X: relationship between molecular geometry and fluorescence of anthranyl-substituted compounds, 117
Fluorine
molecular emission spectra in the visible and near IR produced in the chemiluminescent reactions of molecular fluorine with organosulfur compounds, 217
Fluoroform
IR fluorescence studies of the IR multiple-photon dissociation of the system CDF_3–CHF_3, 1
Formic acid
UV absorption cross-sections of the monomer and dimer of formic acid, 209
Furans
photocatalysis of the Pschorr reaction by $Ru(bpy)_3^{2+}$ in the fluorenone, fluorene and dibenzofuran series, 315
the gas phase photolysis of furan, 273
the vacuum UV photolysis of methyl-substituted tetrahydrofurans, 281

Geometry
thermochromism and photochromism of aryl-substituted acyclic azines X: relationship between molecular geometry and fluorescence of anthranyl-substituted compounds, 117
Germanium
the characterization of germanium p–n junction detectors for use in nanosecond time-resolved near-IR spectroscopic studies: the photosensitized formation of singlet molecular oxygen ($^1\Delta_g$) in solution, 19

Harmines
fluorescence, phosphorescence and basicity in the first excited triplet of 2-methylharmine and harmaline, 109
Hydrazone
the photocyclization of a hydrazone to an indazole, 293
Hydrogen chloride
sensitive chemical actinometry with acetone–hydrogen chloride mixtures, 241

Imidazoles
flash photolysis study of triphenylimidazole, 347
Imides
photochemistry of 3,4,9,10-perylenetetracarboxylic dianhydride dyes: visible absorption and fluorescence of the di(glycyl)imide derivative monomer and dimer in basic aqueous solutions, 189
Indazole
the photocyclization of a hydrazone to an indazole, 293
Ion pairs
photochemistry of ketones in solution LXXVIII: kinetics of fluorescence quenching of 9,10-dicyanoanthracene and 9,10-dimethoxyanthracene by acyclic and cyclic unsaturated ketones and the behaviour of the resulting radical ion pairs, 323
Isatin
the photochemistry of isatin, 139

Juglone
nanosecond laser flash photolysis of 5-hydroxy-1,4-naphthoquinone (juglone), 95

Ketones
photochemistry of ketones in solution LXXVIII: kinetics of fluorescence quenching of 9,10-dicyanoanthracene and 9,10-dimethoxyanthracene by acyclic and cyclic unsaturated ketones and the behaviour of the resulting radical ion pairs, 323
structural and solvent effects in the photochemistry of aliphatic ketones, 49
Kinetics
photochemistry of ketones in solution LXXVIII: kinetics of fluorescence quenching of 9,10-dicyanoanthracene and 9,10-dimethoxyanthracene by acyclic and cyclic unsaturated ketones and the behaviour of the resulting radical ion pairs, 323

Lasers
energy transfer rates in a 7-diethylamino-4-methylcoumarin–rhodamine 6G binary dye mixture laser, 41
Luminescence
luminescence from optical elements commonly used in near-IR spec-

troscopic studies: the photosensitized formation of singlet molecular oxygen ($^1\Delta_g$) in solution, 247

Molecular emission
molecular emission spectra in the visible and near IR produced in the chemiluminescent reactions of molecular fluorine with organosulfur compounds, 217

Nickelocene
quenching of singlet oxygen by nickelocene, 33

Olefins
selectivities in photocycloadditions of arenes to olefins, 167
selectivity and charge transfer in photoreactions of donor–acceptor systems XI: stereoselectivities in metal photocycloadditions of phenol ethers to olefins, 335

Organosulfur
molecular emission spectra in the visible and near IR produced in the chemiluminescent reactions of molecular fluorine with organosulfur compounds, 217

N-Oxides
photochemistry of 2- and 4-benzoylpyridine *N*-oxides, 355
radical mechanism in the photoreaction of organic *N*-oxides: oxygen transfer from photoexcited paradiazine di-*N*-oxides to amines, 363

Oxygen
luminescence from optical elements commonly used in near-IR spectroscopic studies: the photosensitized formation of singlet molecular oxygen ($^1\Delta_g$) in solution, 247
quenching of singlet oxygen by nickelocene, 33
radical mechanism in the photoreaction of organic *N*-oxides: oxygen transfer from photoexcited paradiazine di-*N*-oxides to amines, 363
the characterization of germanium p–n junction detectors for use in nanosecond time-resolved near-IR spectroscopic studies: the photosensitized formation of singlet molecular oxygen ($^1\Delta_g$) in solution, 19

Perfluoroglutaric anhydride
photolysis of perfluoroglutaric anhydride vapor at low pressures: effect of wavelength on the product ratio, 11

Phenanthrenes
photophysical properties of 1,4,5,8-tetraazaphenanthrene, 59

Phosphorescence
fluorescence, phosphorescence and basicity in the first excited triplet of 2-methylharmine and harmaline, 109

Photocatalysis
photocatalysis of the Pschorr reaction by $Ru(bpy)_3^{2+}$ in the fluorenone, fluorene and dibenzofuran series, 315

Photochromism
thermochromism and photochromism of aryl-substituted acyclic azines X: relationship between molecular geometry and fluorescence of anthranyl-substituted compounds, 117

Photocyclization
the photocyclization of a hydrazone to an indazole, 293

Photocycloaddition
selectivities in photocycloadditions of arenes to olefins, 167
selectivity and charge transfer in photoreactions of donor–acceptor systems XI: stereoselectivities in meta photocycloadditions of phenol ethers to olefins, 335
the intramolecular photocycloaddition carvone → carvonecamphor, 159

Photoelectrodes
a technique for reducing the rate of concentration quenching in a dye-sensitized photoelectrode, 257

Photoisomerization
the cis → trans photoisomerization of azobenzene: an experimental re-examination, 185

Photoluminescence
photoluminescence of ruthenium complexes with molecules exhibiting twisted internal charge transfer states, 69

Photosensitization
the characterization of germanium p–n junction detectors for use in nano-

second time-resolved near-IR spectroscopic studies: the photosensitized formation of singlet molecular oxygen ($^1\Delta_g$) in solution, 19
Photostabilization
photochemical fading and photostabilization of the crystal violet lactone colour former system, 379
Product ratio
photolysis of perfluoroglutaric anhydride vapor at low pressures: effect of wavelength on the product ratio, 11
Pschorr reaction
photocatalysis of the Pschorr reaction by $Ru(bpy)_3^{2+}$ in the fluorenone, fluorene and dibenzofuran series, 315
Psoralens
photophysical properties of some coumarin derivatives: 5,7-dimethoxycoumarin, 4′,5′-dihydropsoralen, 8-methoxypsoralen (8-MOP) and 8-MOP($^{4'}_{5'}$,$^{5}_{6}$)THD C_4-cyclomonoadduct (THD ≡ thymidine), 125
Pyridines
photochemistry of 2- and 4-benzoylpyridine *N*-oxides, 355

Quenching
a technique for reducing the rate of concentration quenching in a dye-sensitized photoelectrode, 257
photochemistry of ketones in solution LXXVIII: kinetics of fluorescence quenching of 9,10-dicyanoanthracene and 9,10-dimethoxyanthracene by acyclic and cyclic unsaturated ketones and the behaviour of the resulting radical ion pairs, 323
quenching of singlet oxygen by nickelocene, 33
Quinones
nanosecond laser flash photolysis of 5-hydroxy-1,4-naphthoquinone (juglone), 95

Rhodamine
energy transfer rates in a 7-diethylamino-4-methylcoumarin–rhodamine 6G binary dye mixture laser, 41
Ring closure
laser flash photolysis study of (*E*)-1-(2′-arylidene-1′-phenylhydrazinyl)-1,2-dibenzoylalkenes: mechanistic aspects of photochemical ring closure, 147
Ruthenium complexes
photocatalysis of the Pschorr reaction by $Ru(bpy)_3^{2+}$ in the fluorenone, fluorene and dibenzofuran series, 315
photoluminescence of ruthenium complexes with molecules exhibiting twisted internal charge transfer states, 69

Selectivity
selectivity and charge transfer in photoreactions of donor–acceptor systems XI: stereoselectivities in meta photocycloadditions of phenol ethers to olefins, 335
Singlets
luminescence from optical elements commonly used in near-IR spectroscopic studies: the photosensitized formation of singlet molecular oxygen ($^1\Delta_g$) in solution, 247
quenching of singlet oxygen by nickelocene, 33
the characterization of germanium p–n junction detectors for use in nanosecond time-resolved near-IR spectroscopic studies: the photosensitized formation of singlet molecular oxygen ($^1\Delta_g$) in solution, 19
Solvent effects
structural and solvent effects in the photochemistry of aliphatic ketones, 49
Stilbenes
a laser flash photolysis study of the triplet state of *trans*-azastilbenes, 87
Structural effects
structural and solvent effects in the photochemistry of aliphatic ketones, 49
Sulphamic acid
the photochemistry of sulphamic-acid-treated wool, 391

Thermochromism
thermochromism and photochromism of aryl-substituted acyclic azines X: relationship between molecular geometry and fluorescence of anthranyl-substituted compounds, 117

Thiirane
multiphoton-induced chemistry of thiirane, 263
Time-resolved spectroscopy
the characterization of germanium p–n junction detectors for use in nanosecond time-resolved near-IR spectroscopic studies: the photosensitized formation of singlet molecular oxygen ($^1\Delta_g$) in solution, 19
Triplets
a laser flash photolysis study of the triplet state of *trans*-azastilbenes, 87
direct photochemical population of triplet diazirines: comparison of triplet energies by direct excitation and by energy transfer, 81
fluorescence, phosphorescence and basicity in the first excited triplet of 2-methylharmine and harmaline, 109

Wool
the photochemistry of sulphamic-acid-treated wool, 391
